Exciting News from Stealth –
Launching a New Product Family

We are thrilled to announce the launch of a groundbreaking addition to our product lineup – the **Stealth Panel PCs**, an All-in-One solution designed to revolutionize Rugged Computing. These integrated units are set to redefine the standards of performance, durability, and efficiency in the harshest of environments.

To kick off this exciting launch, we are releasing a video to showcase the unparalleled capabilities of our new Panel PCs the **SPC Family** !

Get a sneak peek into this innovative product category. Witness the integration of traditional fanless PCs and Monitors into a single, space-saving unit. Experience the synergy of Stealth's 30+ years of expertise in rugged industrial PCs and Displays, now brought together in one powerful package. **Watch the Video here**!

Why Choose Stealth's Panel PCs?

• **Space-Saving Design**: Combines the Computer and Display into a single unit, freeing up valuable workspace.
• **Simplified Installation**: Streamlined setup with fewer components and reduced wiring.
• **Enhanced Durability**: Engineered to withstand the harshest environments, ensuring reliable operation.
• **Ease of Maintenance**: Simplified troubleshooting and servicing minimize downtime.
• **Touch Screen Functionality**: Ideal for industrial use, even with gloves.
• **Customization and Scalability**: Tailored to meet specific industrial needs with various sizes and options.

Learn about this Family !

We invite you to visit our **website**, watch the Product Video or book a personalized demo/discussion to see our Panel PCs in action. Our team is ready to show you how these powerful units can transform your rugged operations. Contact your **Stealth sales representative** today for more details and to schedule your demo.
