

Stealth's Space Saving Rack Servers: Compact Powerhouses for High-Performance Computing

In an era where space optimization and computing power are pivotal, Stealth is proud to offer our lineup of **short depth Rack Servers**, combining compact design with unmatched performance and flexibility. Our innovative models - SR-1550, SR-2501, SR-28401/02, and SR-2870/75 - not only embody the pinnacle of engineering excellence but also cater to the demanding requirements of modern businesses. With short depth and low height configurations as slim as 1U and 2U, and with depths as low as 14 inches, these servers are meticulously designed to ensure reliability, power, and efficiency. They seamlessly integrate into limited spaces while providing the computational heft and adaptability essential for today's dynamic business environments.

SR-1550: The Ultimate Space-Saver

The **SR-1550** is a testament to Stealth's commitment to innovation, offering a powerful 1U rack computer/server in an incredibly compact chassis. Ideal for shallow racks, this model has a variety of expansion slots, massive drive storage, and optional onboard RAID configurations. Designed for 24/7 operation, this model is built to your exact specifications, ensuring maximum performance and reliability.

SR-28401/02: Single or Dual Systems, Zero Noise

Stealth's **SR-28401 / SR-28402** models redefine efficiency by accommodating either one or two systems within a single 2U space, all while maintaining a Fanless, noise-free design. Powered by Intel's® processors, these servers support up to plenty of memory and storage options, making them perfect for high-stakes environments where performance and silence are key. Their

rugged design and wide range of I/O ports, including 4K Ultra HD support, make them versatile for various applications.

SR-2501: Compact Yet Mighty

With a depth of only 14", the **SR-2501** short depth 2U Rack Computer/Server is a powerhouse, offering the latest Processors and up to 28TB of mass storage space. This model exemplifies Stealth's dedication to delivering high performance in a small footprint, suitable for any demanding business or application needs.

SR-2870/75: Fanless Design Meets High Performance

The **SR-2870** and **SR-2875** models are Stealth's answer to the need for powerful, Fanless 2U Rackmount Servers/PCs that can operate in a wide range of temperatures. Their Fanless design not only minimizes noise but also reduces the risk of dust-related failures, making them ideal for sensitive and critical applications.

Why Choose Stealth's Short Depth Rack Servers?

Stealth's short depth Rack Servers offer a unique blend of compact design, powerful performance, and ultimate flexibility. Whether you opt for the space-saving SR-1550, the silent yet powerful SR-28401/02, the mighty SR-2501, or the robust SR-2870/75, you're guaranteed a server that meets Stealth's high standards for quality and reliability.

Each model is rigorously tested and certified (UL, CE, FCC & RoHS), ensuring they meet the highest standards for quality and performance. Designed for continuous 24/7 operation, our servers are priced to meet your budget without compromising on quality.

In conclusion, Stealth's short depth rack servers are more than just hardware; they're a commitment to providing businesses with the tools they need to succeed in today's fast-paced, data-driven world. With Stealth, you're not just buying a server; you're investing in a solution that brings space savings, big power, and unparalleled flexibility to your fingertips.
